Packaging Systems

## Transport packaging

LOAD CARRIER

### CONSTRUCTIONAL FEATURES

- » Multi-material solution made from corrugated cardboard and wood
- » The packaging consists of outer packaging, a milled wooden crate, an expander cable and clips for the wooden fittings
- » Cushion foam protects the painted parts during transportation
- » Packaging is easy to fill
- » Using the expander cable makes it quick and easy to fix the car bumpers in position

### CONSUMER BENEFITS

- » The container is delivered assembled or flat-pack
- » All components are located in the container which avoids additional deliveries having to be made
- » Stackable in the warehouse and also during transportation

### ENVIRONMENTAL ASPECTS/SUSTAINABILITY

- » Easy separation of materials, therefore correct sorting for recycling
